DATA SAFE WITH RFID PROTECTION CREDIT CARD CASES / WALLETS

"PUMECH" credit card wallet is made of aluminium combine with plastic. Wallet is RFID tested and secure; can hold up to 6 cards at any one time, meaning your most precious cards are all secure.

As well as protecting your data, the aluminium housing prevents the deterioration of cards that can often become brittle, split or crack when stored incorrectly.

Your cards are now easier to access by simply press the handy button at the bottom of the case. When press, each card pops up at each separate level so you can easily pick out the one you need. Handy and convenient but ultimately RFID secure.

Protect your identity from wou hieves with this GPLUS's "Cross" credit card wallet. They are made of aluminum combine with plastic and prevent RFID scanning of your cards to gain access to information that could be used against you. The credit card wallet has simply pull function to make it easy to access any cards when you are ready to pay for purchases. Furthermore, it is small enough to fit in either a purse or pocket so you can carry it everywhere with you.

The hard wallet prevents your cards from getting demagnetized. In addition, it protects the cards from getting bent or damaged in other ways. This modern-looking wallet provides both function and style for the user.

CC SAVE | ALUMINUM MADE

This wallet has everything you need, money clip and a place to carry the credit cards, debit cards, shopping and/or club cards, driver's license, ID card and others important private property safely.

The credit card wallet is made by aluminum or carbon fiber material which is better and lighter than alloy. A slim, light body, fashionable and convenient appearance, RFID blocking protection design. Let everyone be free from the heavy purse strings and apply to everyone. Credit card wallet with money clip 2 in 1: It actually holds 1-20 cards comfortably, in addition to 1-20 bills.

DURABLE • METAL KEY HOLDERS

When you're handing off your car keys at a valet parking station, you probably don't want to hand off the entire keyholder.

Sure, it's probably just paranoia, since the valet parking staff are unlikely to drive your car to your house, use your house key to get in, then rob you while you're at a restaurant or party. Still, most people don't like parting with more keys than necessary. And that's not just when they're handing off keys to valet parking staff.

Fortunately, there's a keyholder with a unique design that allows you to easily separate some keys from others.
